## Description

A8 LED grow light is one of the Apollo series, it has 8 luminous tubes. This LED grow light will bring the growing benefits of sunlight for year round plant growth indoors, it has a potential to increase crop yield up to 25% than without grow light. The A8 LED grow light has been specifically designed to match the required sunlight plants require, they are perfect for bringing light to areas as small as a shelf, they are also can be used on a greenhouse for a variety of horticultural and growing needs. As a grow light, A8 led grow light has a number of advantages than traditional grow light, such as it can save up to 70% in energy consumption compared to typical non-LED grow light. One of the largest benefits of A8 grow light is having almost no heat generated in the process of running, even it can dissipate this minimal heat at the same time. Thus it can be seen that A8 led will be the best option for your greenhouse or other indoor greening house.
