

G125 Globe LED Filament Bulb

Product Description

G125 Globe LED Filament Bulb is contrary to other LED bulbs that provide light in only one direction, the LED filaments are placed inside the glass enclosure in four sides to make sure that light is spread in all directions. While G125 Globe LED Filament Bulb keeping the elegant shape light, it also brings shining and high quality light at a low consume. What's more, there is no delay in illumination when G125 Globe LED Filament Bulb switched on.

Benefits of LED filament bulb:

1. Energy-saving, low heat, low power consumption, stable performance.
2. Long life span, it can last 25000 hours.
3. LED filament lamps offer aesthetically appealing designs combined with quality and energy efficiency
4. Perfect blend of traditional and cutting-edge technology.
5. Great reducing carbon emission, environmentally friendly.
6. With traditional incandescent lamp design, it can be easily accepted by common people.
7. With 360° beam angle, the filament bulb can give out light omnidirectional.
8. No radiation, no mercury, instant start, no flicker, no harm to human eyes.
9. Does not contain lead, mercury and other pollution elements.
